Born Survivor: Bear Grylls Oct 24 2019 Bear Grylls is no stranger to extremes. During a three-year stint in the SAS he was involved in a horrific parachuting accident in Africa and broke his back in three places. Months of rehabilitation followed but, never losing sight of his childhood dream of climbing Everest, Bear went on to become the youngest Briton ever to reach the summit and survive. It was a close-run thing, however, as during the descent he was almost killed in a crevasse, his life saved only by his team-mate and a rope. In 2003 Bear completed another world-record-breaking expedition, leading his team through freezing spray and

icebergs across the North Atlantic Ocean in a small inflatable boat. More drama followed as Bear, a karate black belt, set out to show the viewers of Channel 4 what it is really like to complete the gruelling basic training of the Foreign Legion. Now, in *Born Survivor* which accompanies a brand new eight-part series for Channel 4, the world's ultimate survivor shows us how to stay alive in the most unforgiving conditions on Earth. From crossing piranha-infested rivers and finding fresh food to building bush fires and fighting off grizzly bears - all manner of survival techniques from our most dangerous environments are covered. So, whether you find yourself stranded on a desert island in the Pacific, lost in the Lake District, or stuck in the snow on Greenland, once you've read this book, you too will be able to beat the elements and survive the wild.

Extreme Food Mar 29 2020 There's no getting away from it; I've eaten some pretty extreme things in my

time " live tarantulas, raw goat testicles, elephant dung, you name it. In a situation when your life depends on it, you need to put your prejudices aside to keep your stomach filled and your strength up. Whether it's mastering the art of foraging and cooking up a tasty feast around the campfire or learning about the more extreme end of wild food (ever tried a scorpion kebab?), there's a lot to learn when it comes to dinner time in the wild. This book will teach you all the necessary skills and techniques to get your teeth into meals you might never have thought of as food in the first place " and, crucially, how to recognize plants and animals that might end up doing you more harm than good. In today's world, we rarely need to venture beyond the local supermarket and we turn our noses up at the thought of snacking on bugs and grubs. But out in the wild, Mother Nature has provided us with a plentiful supply of nutritious " if not always delicious " food for the taking. And when needs must, we just have to know where to look. Some of it might take you out of your comfort zone. Some of it might turn your stomach. But it's saved my life more than once. And one day, it might save yours . . ."

"When disaster strikes and we find ourselves alone in an unknown and hostile environment, why do some people survive and others perish? Almost all of the most extraordinary tales of survival seem to involve an indefinable Ingredient X, which can only be understood as

having its source in that mysterious entity, the `human spirit.'"
