Responding to the sexual desires of older adults in residential environments is widely recognized as a challenge by care staff, administrators, and family members. This new resource meets the challenge head on, exploring the issues surrounding sexual expression from all perspectives. It addresses the question of how, in an increasingly person-centered care culture, long-term care facilities balance individual resident rights against the needs and concerns of the community as a whole. Who decides what is appropriate or inappropriate, and how? The first book to take a person-centered approach to resident sexuality in long-term care, this groundbreaking training tool represents sexual expression as a significant part of personality, explains why it is important to honor longings for intimacy, and provides strategies for teaching staff how to effectively, respectfully, and compassionately acknowledge those needs. It will enlighten anyone who believes sexuality vanishes with age. As eldercare replaces childcare as the number one issue facing baby boomers, Tax-Free Money for Long-Term Care is one book you need to take back control of your life and provide excellent long-term care for your aging loved ones without them going broke in the process. As boomers enter their 70s, more people than ever need long-term care. The cost of nursing homes, assisted living, home health care, and other care options is painfully steep, and navigating Medicare and Medicaid can be challenging. Long-Term Care comes to the rescue with reliable, practical, plain-English information on long-term care options and how to pay for them. "This concise guide to long-term services and supports introduces a broad array of topics and presents ideas on how to get more extensive information... A variety of graphs, tables, and charts make the information easy to understand. Overall the book is well-organized with chapters that can stand on their own... Readers considering going into long-term care management or administration would find this book a valuable tool."--Doody's Medical Reviews This is a comprehensive reference for long-term care administrators, practitioners and students who want to understand the options, issues, and trends related to the effective administration and management of long-term care communities. The book is unique in its in-depth focus on what needs to be accomplished and the evidence-based information about what actually works. Multifaceted insights address the ever-changing world of the long-term care industry and offer best practices and model programs in eldercare. This multidisciplinary book covers the most crucial aspects of management including federal and/or state regulations required to provide long-term care services and operate long-term care communities. It offers advice on care at home, naturally occurring retirement communities, and continuing care retirement communities, client care, staff retention, preventing elder abuse and neglect, anticipating and managing litigation and arbitration in long-term care, aging and human diversity, Alzheimer's Disease, palliative care, care transitions, and much more. Distilling many years of practical, research and teaching experience, the authors provide the necessary tools and tips that will enable professionals to maximize the quality of care and the quality of life for older adults living in long-term care communities. Each chapter includes helpful pedagogical features such as learning objectives, case studies, effective practices, and/or model programs in eldercare. Key Features: Based on federal and/or state regulations required to provide long-term care services and operate long-term care communities Examines the complex operations of long-term care options for effective eldercare Highlights the most cost-effective practices and model programs in long-term care communities that are currently used throughout the United States Provides useful tips about client care and staff retention as well as marketing and census development, financing and reimbursement, and legal issues Promotes innovative collaboration between education, research, and practice that is reflected by the training of the editors and contributing authors The realities and misconceptions of long-term care and the challenges it presents for the ethics of autonomy are analyzed in this perceptive work. While defending the concept of autonomy, the author argues that the standard view of autonomy as non-interference and independence has only a limited applicability for long-term care. He explains that autonomy should be understood as a comprehensiveness that defines the overall course of a person's life rather than as a way of responding to an isolated situation. Agich distinguishes actual and ideal autonomy and argues that actual autonomy is better revealed in the everyday experiences of long-term care than in dramatic, conflict-ridden paradigm situations such as decisions to institutionalize, to initiate aggressive treatments, or to withhold or to withdraw life-sustaining treatments. Through a phenomenological analysis of long-term care, he develops an ethical framework for it by showing how autonomy is actually manifest in certain structural features of the social world of long-term care. Throughout this timely work, the rich sociological and anthropological literature on aging and long-term care is referenced and the practical ethical questions of promoting and enhancing the exercise of autonomy are addressed. This comprehensive graduate textbook focuses on the full spectrum of long-term care settings ranging from family and community based care through supportive housing options to a variety of institutional long-term care alternatives. Integrating theory and practice, the book features the perspectives of diverse fields regarding current long-term care options and new directions for the future. Prominent scholars from history, environmental design, family caregiving, gerontology, social service delivery, clinical care, health service delivery, public policy, finance, law, and ethics explore such themes as: Relationships among independence, dependence, and interdependence Ethical considerations in the provision of long-term care Decision-making in long-term care Fluidity and transitions in long-term care The lived experience of long-term care A micro-macro perspective ranging from the individual to societal institutions The book examines future directions for long-term care, considering such factors as the interface of technology and long-term care, cultural diversity, and relationships between voluntary and paid services. Each chapter includes case examples, study questions, and exercises, additional resources, and website links. The appendices provide a glossary and a list of acronyms. Instructor's resources are also available. Key Features: Focuses on the full array of long-term care options Integrates theory and practice Incorporates the perspectives of diverse fields including history, environmental design, family caregiving, social services and public policy Includes numerous case examples, study questions, exercises, and additional resources Considers new approaches to long-term care incorporating technology and considering cultural diversity and the relationship between voluntary and paid services The Long-Term Care Restorative Nursing Desk Reference is a new all-inclusive desk reference that describes the clinical aspects of restorative nursing in detail and provides a much-needed guide for nurses in a long-term care facility. This book offers the help you need to create or sustain an effective restorative care program that puts your resident's needs first. Print+CourseSmart Long-Term Care Medicine: A Pocket Guide lessens the uncertainty involved in caring for patients in a long-term care facility. This practical pocket guide is divided into four sections: Introduction, Common Clinical Conditions, Psychosocial Aspects, and Special Issues in Long-Term Care. The chapters address all the varied components of the LTC system as well as how to take care of the patients and residents living within it. The contributors to this easy-to-read guide are passionate about LTC and many have worked within the American Medical Directors Association to create and disseminate a knowledge base for practitioners. Long-Term Care Medicine: A Pocket Guide is an invaluable resource for clinicians, practitioners, and educators who are seeking to optimize the care and living experience of residents in LTC by providing resident-centered care as well as resident choice, well-being, dignity, and an improved quality of life. This book proposes a review of Long-Term Care insurance; this issue is addressed both from a global point of view (through a presentation of the risk of dependence associated with the aging of the population) and an actuarial point of view (with the presentation of existing insurance products and actuarial

techniques for pricing and reserving). It proposes a cross-view of American and European experiences for this risk. This book is the first dedicated entirely to long-term care insurance and aims to provide a useful reference for all actuaries facing this issue. It is intended for both professionals and academics. Life expectancy is increasing in many parts of the world and more are also being enabled to live with disabling conditions that once might have been fatal. People who are chronically ill, have serious disabilities, have HIV/AIDS, are mentally ill, or victims of accidents and disasters, or elderly - many will need continuing care and support and these numbers will grow. How best to meet these needs is getting more attention. Such care is not to just look after the sick but to enable those with long term illnesses or disabilities to live their lives as fully as possible. Institutionalization is often not the best way of care and the home where the patient lives with family members and friends nearby is often more appropriate. This report examines the options, highlighting the clear benefits of home-based care whilst being aware of the needs of the carers in the home. The report stresses it is time for health systems to take responsibility for providing caregivers in families and communities with the support they both need, and to bring greater benefit to the patient. Recognizing rapidly ageing population is one key concern faced by cities and the challenge it would present to healthcare system, this book looks at ageing in China's population as well as the delivery and financing of long-term care (LTC) in China. The book compares key features of long-term care insurance (LTCI) schemes in fifteen pilot cities and evaluates the sustainability of various financing models adopted by the cities in the LTCI schemes. The book uses an interpretive case study approach to give an in-depth look into the LTC models in three pilot cities – Qingdao, Nantong, and Shanghai. The three cities represent three different models of financing and delivering LTC. To assess how effective the LTC models in these three cities are, the book uses five criteria, including utilization of medical resources, cost, equity, quality of care and sustainability. The authors also discuss how the financing and delivery of LTC can be improved in China, the impact of the 2019 coronavirus disease (COVID-19) pandemic on older adults in need of LTC in the country and the implications of China's LTCI reform for other countries. The book will be a useful reference to scholars and policy makers who look at urban ageing and healthcare costs and delivery.

A PRACTICAL GUIDE TO THE COMPLICATED ISSUE OF LONG-TERM CARE INSURANCE "Next to buying the right long-term care insurance, buying and reading J.K. Lasser's *Choosing the Right Long-Term Care Insurance* is the best investment seniors and their families can make to help insure independence and dignity in their golden years." -Scott Harshbarger, President and CEO, Common Cause "An indispensable book for all those concerned that the cost of health care will rob their old age of dignity and independence. The author, Ben Lipson, an articulate advocate of patient rights and an authority on health insurance, provides a lucid road map in a terrain mined with hokum." -Bernard Lown, MD, winner of the Nobel Peace Prize "Long-term care insurance is a much-needed and valuable insurance concept, marketed in a maze filled with smoke and mirrors. Most of what passes for consumer guidance is just general information and superficial advice. But Ben Lipson's book takes you by the hand, leads you through the insurance labyrinth, and shines a much-needed light on the product." -Charlie Sabatino, President, National Academy of Elder Law Attorneys

J.K. Lasser--Practical Guides for All Your Financial Needs Please visit our Web site at www.jklasser.com "This book should be required reading for all who work in care settings and the text used for leadership and health care administration courses in colleges....Farrell's personal journal is as compelling as a good novel, except it is nonfiction! You want to laugh, cry, scream, and shout halleluiah."---Joanne Rader, R.N., B.S.N., M.N., Nurse Consultant, Rader Consulting "The pages of this toolbox will be dog-eared from use. No more excuses! This works!"---Rose Marie Fagan, Co-founder and Founding Executive Director, Pioneer Network "Nursing home leaders from the bedside to the boardroom need a 'field guide' to help them make critical decisions and this book fills the gap."---Robyn Stone, Dr, PH., Senior Vice President for Research, LeadingAge, Washington, D.C. Whether your care facility is flourishing or floundering, its success depends on what you do as administrator, director of nursing, or other leader. Your decisions and actions can improve staff performance and ensure high-quality care. The organization that prospers has staff who know you care. Based on the authors' abundant skill in guiding hundreds of nursing homes through organizational transformations, this book gives you the tools and strategies to achieve stable staffing, optimal care, and high census, and to become a leader in a thriving nursing home. Read one administrator's compelling account of a year making a difference in his nursing home, followed by elucidating examples, advice, and wisdom that come from decades of first-hand experience working with long-term care facilities. This book is an essential resource for nursing home owners and corporate staff, administrators and directors of nursing, and all those committed to helping long-term care organizations to be better places to live and work. This book provides a comprehensive overview on the long-term care systems in 12 EU member states and Norway. Focusing on the legal background and its main principles, it includes a comparative analysis which highlights the principal dissimilarities between European long term care benefits, but at the same time also a variety of features in common. It also discusses the increasingly transnational dimension of long-term as a result of migrants returning to their country of origin in old age, and the still-unsolved legal problem of entitlement to long-term care benefits in another EU-member state. The number of elderly and disabled adults who require assistance with day-to-day activities is expected to double over the next twenty-five years. As a result, direct care workers such as home care aides and certified nursing assistants (CNAs) will become essential to many more families. Yet these workers tend to be low-paid, poorly trained, and receive little respect. Is such a workforce capable of addressing the needs of our aging population? In *Who Will Care for Us?* economist Paul Osterman assesses the challenges facing the long-term care industry. He presents an innovative policy agenda that reconceives direct care workers' work roles and would improve both the quality of their jobs and the quality of elder care. Using national surveys, administrative data, and nearly 120 original interviews with workers, employers, advocates, and policymakers, Osterman finds that direct care workers are marginalized and often invisible in the health care system. While doctors and families alike agree that good home care aides and CNAs are crucial to the well-being of their patients, the workers report poverty-level wages, erratic schedules, exclusion from care teams, and frequent incidences of physical injury on the job. Direct care workers are also highly constrained by policies that specify what they are allowed to do on the job, and in some states are even prevented from simple tasks such as administering eye drops. Osterman concludes that broadening the scope of care workers' duties will simultaneously boost the quality of care for patients and lead to better jobs and higher wages. He proposes integrating home care aides and CNAs into larger medical teams and training them as "health coaches" who educate patients on concerns such as managing chronic conditions and transitioning out of hospitals. Osterman shows that restructuring direct care workers' jobs, and providing the appropriate training, could lower health spending in the long term by reducing unnecessary emergency room and hospital visits, limiting the use of nursing homes, and lowering the rate of turnover among care workers. As the Baby Boom generation ages, *Who Will Care for Us?* demonstrates the importance of restructuring the long-term care industry and establishing a new relationship between direct care workers, patients, and the medical system.

Illinois is the fifth largest state in the country with 12.4 million people in 2000; the population increased by almost 9% or about one million people in the past decade. About 12% of the state's population is age 65 and older -- 1.5 million people in 2000. By 2025 the Illinois elderly population is expected to increase by over 50% and will be 16.6% of the state's total population. Illinois is one of the few states in the country that provides older persons and younger adults, who meet the eligibility criteria, with state entitlements to home and community-based long-term care services. Both entitlements resulted from court cases that were brought to eliminate waiting lists for services. The state funds the Community Care Program for older adults and the Home Services Program for persons with physical disabilities with a combination of state general revenue funds and Medicaid Section 1915 (c) waiver funds. The Community Care Program uses contracted agencies for the provision of homemaker, adult day care services, and case management services. In contrast, the Home Services Program's relies primarily on personal assistants, whom consumers supervise, to provide services. According to state officials, in 2002 the state had about 3,000 people with developmental disabilities in state-operated development centers (SODCs), 6,500 people in private intermediate care facilities for the mentally retarded (ICFs/MR) and 8,800 people in Section 1915 (c) Medicaid home and community-based services waivers for the developmentally disabled. Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care. A one-of-a-kind collection of anthropological research on nursing homes compiled with the purpose of developing a theory of the culture of long term care. Expert advice on planning for your own or a relative's future care needs As we live longer and healthier lives, planning for the long term has never been more important. This comprehensive guide gives you questions to ask yourself and others about how best to achieve your goals, whether you have immediate needs or can take some time to sort out the possibilities. The book Covers home modifications so that you can stay at home safely for as long as you like Lays out the opportunities and costs associated with independent living, assisted living, and other options Gives you a range of driving and transportation alternatives Sorts out the various sources of care at home Helps you navigate the healthcare system Reviews the legal documents you should prepare and update Helps you determine whether you need long-term care insurance Offers checklists and other resources to help you make decisions Gives you guidance on how to talk to your family about sensitive issues If you're looking for trusted information on how to prepare for the future care needs for yourself or a relative, this sensitive, realistic, and authoritative guide will start you on the right road. Comprehensive overview of every kind of long-term care service; how to decide which option is best for you or your loved one; everything you need to know about your financial options. As we age, the exorbitant cost of long-term care is, by far, the greatest risk to one's financial security. From hiring a home-health aide, to paying for assisted living facilities or nursing home care, five years of long-term care can easily cost between \$200,000.00 and \$600,000.00 - which will completely decimate the life savings of most Americans. Most people don't realize that Medicaid is available to pay for long term care expenses. Even fewer know that one can legally and ethically qualify for Medicaid before going broke! This book was written by a Florida elder law attorney and includes an overview of Medicaid Planning, with chapters devoted to: - The Medicaid Income and Asset Tests - Countable vs. Non-Countable Assets - What is a Qualified Income Trusts (Miller Trust), and when is one needed? - How to Protect Your Home (or sell the house and still be Medicaid eligibility) - Clarifying the 5-year look back period (no, you shouldn't have to wait 5 years to engage in Medicaid Planning) - Personal Services Contracts (Caregiver Agreements) - Special Needs Trusts - How to minimize or avoid Medicaid estate recovery - other lesser-known Medicaid Planning techniques The book will explain how to take someone with too many assets and qualify them for Medicaid. It will also explain how to protect one's Medicaid eligibility after receiving a sudden influx of assets (such as from a personal-injury settlement or after receiving an inheritance). Given the amount of misinformation being disseminated about Medicaid, and who is able to obtain those long-term care benefits, this guide (written by a Florida Medicaid lawyer - <https://www.elderneedslaw.com/> - for the benefit of non-lawyers) seeks to provide clear steps to enable you to understand how you can tap valuable resources in order to care for yourself, your spouse, or your elderly loved one. Staff attitudes and caregiving practices are transformed when individuals learn what it's really like to be a resident in the care setting where they work. Through the Looking Glass is a program first designed and implemented at Aviston Countryside Manor. Staff members participating in the program live at the residence, receive a diagnosis, experience daily challenges, and compete to see who endures the longest. The resulting lessons in empathy produce unprecedented results in the way daily care and operations are conducted. This powerful, culture-changing program can be replicated in any residential care setting. Implementation steps are punctuated with moving personal accounts of staff and resident experiences and revelations. The first comprehensive analysis of ethnic/racial differences in long-term care needs and service use. This workbook to accompany Assisting in Long-Term Care, 5th Edition, helps you reinforce your knowledge of essential concepts. There are numerous exercises and activities to accompany each lesson, presented in a variety of formats. This assortment challenges you to think about what you learn in various ways. Long-Term Care: Managing Across the Continuum, Third Edition is an ideal introduction to management in this dynamic industry. Concise, yet complete, it defines the various segments of the system, describes how the system developed to its current state, compares it to an ideal system, and projects future trends. Adopted as a reference for the national licensing examination prepared by the National Association of Long-Term Care Administrator Boards (NAB), this book covers the full continuum of long-term care. The Third Edition is a comprehensive revision reflecting the changes in regulations, financing methods, forms of service delivery, and management methods in this dynamic field. The increasingly important topics of the aging of American society, the impact of the baby-boomers, consumer choice, and the growing diversity in long-term care are covered extensively and from a variety of perspectives. The final chapters address the future of long-term care and include recommendations for dealing with it proactively. Practical approaches to the operation of long-term care facilities Managing the Long-Term Care Facility provides a comprehensive introduction to the growing field of long-term care. Taking a continuum-of-care approach, the text covers every aspect of long-term care. Readers will develop a robust knowledge of the issues faced by people experiencing physical and or mental changes. Topics covered include the biological and psychosocial implications of ageing, marketing long-term care, facility operations, and information technology for health care, among many others. By integrating all aspects of long-term care, the book is an invaluable resource that will aid students and professionals in preparing for career advancement and licensure exams. The book is also designed to help students prepare for the National Nursing Home Administrator exam. Pedagogical elements help guide readers through the content, and summaries and discussion questions to drive home lessons learned. Builds expert knowledge of all aspects of long-term care management, including operations, human resources, patient advocacy, and information systems Emphasizes the latest understandings of the long-term care continuum and patient-centered care for diverse populations Delivers practical approaches to providing quality care to individuals and making a positive impact on community wellbeing Prepares readers for and National Nursing Home Administrator's licensure exam Managing the Long-Term Care Facility: Practical Approaches to Providing Quality Care provides real-world guidance for students in healthcare administration, health and human services, gerontology, nursing, business and medical programs, in both domestic and international markets.
