Physiology of Fish in Intensive Culture Systems Oct 29 2022 Fish culture in hatcheries and other aquacultural facilities is becoming much more intensive all over the world. The success of all kinds of fish rearing depends on the quality of management and this depends, in turn, on understanding the biology of fishes and the aquatic environment in which they live. This book directly addresses the relationship between the aquatic environment and the fishes. An understanding of this by the reader will result in a reduction of disease outbreaks through improved management.

Tourist Behaviour and the Contemporary World Dec 27 2019 This volume seeks to review and stimulate interest in a number of emerging and fresh topics in contemporary tourist behaviour and experience. Topics explored include the effects of newer technologies on tourists' behaviour and experience, tourists' experience of scams, safety and personal responsibility, individual perspectives on sustainability, and some dimensions of tourists' personal growth, relationships and altruism. The topics are bound together by an integrative approach to conceptualising experience which is seen as an ensemble of orchestrated sensory inputs; affective reactions; cognitive mechanisms used to think about and understand the setting; actions undertaken and the relevant relationships which define the participants' world. A special emphasis is placed on tourists' stories as a pathway to access the nature of tourists' experience. Potential research directions in the field are indicated throughout.

Bus Transport Jun 24 2022 Bus Transport: Demand, Economics, Contracting, and Policy examines in one source the most critical and current research themes of public transport relevant to regulators, planners, operators, researchers and educators. It highlights the wider economic impacts of public transport and compares energy usage across all public transport modes. The book examines the evolving debate on Mobility as a Service (MaaS) and includes discussion of such themes as; public image issues, performance measurement and monitoring, contract procurement and design models, travel choice and demand, and global public transport reform. The book reflects the leading perspectives on the preservation and health of the bus sector, intending to move public transport reform forward. Compiles in one source up-to-date insights on important public transport themes, issues, and debates Examines a wide range of public transport topics in the multidisciplinary fields of economics, policy, operations, and planning Bridges the gap between scientific research and policy implementation

Small Group Research Feb 18 2022 This book provides comprehensive coverage of recent research in psychology relating to small groups. Major new work is described and thousands of studies are at least cited within a logical framework. A thorough overview of the field is provided and specialists concerned with particular kinds of groups are likely to find references to all major research in their areas. The findings of various studies contain many surprises, especially with regard to the generality and specificity of previously known principles. Particular emphasis is given to studies involving - or having fairly immediate relevance to - face-to-face social interaction.

The SAGE Encyclopedia of Contemporary Early Childhood Education Jan 26 2020 The general public often views early childhood education as either simply "babysitting" or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development – physical, cognitive, language, social, emotional, aesthetic – as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

Psychology Library Editions: Social Psychology May 24 2022 Psychology Library Editions: Social Psychology (30-volume set) brings together an eclectic mix of titles from a wealth of authors with diverse backgrounds, seeking to understand human behaviour and interaction from a socio-psychological perspective. The series of previously out-of-print titles, originally published between 1908 and 1993, includes those from some authors considered to be founders of social psychology and traces the development of the subject from its early foundations.

Aquaculture Ecosystems Oct 05 2020 *Aquaculture Ecosystems* contains a thorough and exciting synthesis of current information on aquaculture practices and substantial discussion of the way forward in transforming the aquaculture industry by improving its sustainability. This important book includes discussion of all the current major issues relating to aquaculture practices in relation to the ecology of their situations, environmental concerns, and details of how sustainability can be improved. Efforts have been made to include chapters that go beyond the stage of debate on old topics, providing conclusions to provide leads for action plans and practices addressing modern challenges such as global climate change. Commencing with a chapter covering concerns and solutions centred around seafood security, the following chapters cover the biology and behavior of aquatic animals and their selection for use in aquaculture systems, integrated multi-trophic aquaculture, nutrient inputs and pollution, biofouling, blue carbon stocks in coastal aquaculture, climate change adaptations and knowledge management in aquaculture. Written by internationally-recognized experts in aquaculture and ecology, and edited by Saleem Mustafa, well known for his work in aquatic sciences, the book provides a great deal of use and interest to all those involved in aquaculture planning and development, environmental sciences and aquatic ecology. All libraries in universities and research establishments where biological sciences and aquaculture are studied and taught should have copies of this vital reference on their shelves.

Planning for a Better Urban Living Environment in Asia Dec 31 2022 First published in 2000, this volume explores how Asia has developed very rapidly in the last quarter of the century and will be a main focus of the world in the 21st century. With rapid growth and development, the urban areas in the region are undergoing dramatic changes. An appreciation of the heterogeneous nature of Asian cities and the related planning practices in the first step to understand various urban development problems in the region. This book is a consolidated effort by prominent scholars in Asian planning schools to explore urban development and planning practices in Asia. The book reflects on and examines some of the past and current challenges, and considers future prospects of urban and regional planning, environment, housing, redevelopment and conservation, and planning education in Asia. This book should be useful to students, teachers, researchers, professionals and people who are interested in urban development, planning and environment in Asia.

Nonverbal Communication Mar 22 2022 Drawing significantly on both classic and contemporary research, *Nonverbal Communication* speaks to today's students with modern examples that illustrate nonverbal communication in their lived experiences. This new edition, authored by three of the foremost scholars in nonverbal communication, builds on the approach pioneered by Burgoon, Buller and Woodall which focused on both the features and the functions that comprise the nonverbal signaling system. Grounded in the latest multidisciplinary research and theory, *Nonverbal Communication* strives to remain very practical, providing both information and application to aid in comprehension.

Social Behavior in Farm Animals Feb 06 2021 An understanding of social behaviour is increasingly necessary in farm animal husbandry as more animals are housed in groups rather than in individual stalls or pens. There may be economic or welfare reasons for such housing. This book is the first to specifically address this important subject. The chapters fall into three broad subject areas: concepts in social behaviour; species specific chapters; current issues. Authors include leading experts from Europe, North America, Australia and New Zealand. Animal welfare/behaviour issues are becoming increasingly important Combines theoretical and practical details about the social behaviour of our most common farm species Written by leading experts from around the world

School Violence Intervention Aug 22 2019 This work offers effective intervention strategies for managing school violence. Opening with a range of perspectives on student aggression, it provides a comprehensive view on practical interventions at the student, school, and systems levels. Practitioners present empirically-grounded strategies for an array of school settings and situations, seeking to help readers make informed decisions about the approaches that would be most effective in their own environments.; The first part of the text presents information on the nature and prevalence of youth violence today, and outlines strategies geared toward making the school physically safer, establishing clear behaviour standards, providing adequate adult presence, enforcing rules fairly and sanctioning offenders, and creating partnerships with outside agencies.; The chapters that follow describe a range of interventions directed toward aggressive students themselves which have proved highly effective in outcome evaluation research. These approaches include behavioural classroom management, crises- and gang- orientated interventions, and preventative pre-school programmes. In addition, it details school-orientated strategies such as academic and curriculum interventions, vandalism control, and effective security policy. Exploring the complex relationship among school behaviour, family life, and community, chapters also consider avenues toward effecting change in the larger context of the students' lives.; A hands-on manual for dealing with some of the most intractable problems education professionals face, this book offers extensive information for school psychologists and researchers.

The Psychological Consequences of Crowding Jul 26 2022 This is the first systematic attempt by an Indian social scientist to examine the consequences of crowding -- a serious problem in most developing countries. The volume contributes to the field of man-environment relations by providing a behavioural perspective on life in crowded environments, and the effect on social behaviour and affective processes. After an overview of research, the author reports the findings of field studies and experiments, some of which were conducted by himself at three levels: personal, interpersonal and community. Jain discusses the inter-relationship of population density with psychological processes, particularly those that are affective, social and motivational. He points out that the consequences of high population density include stress, anxiety and withdrawal.
