**The Pursuit of Equality in the West** Feb 08 2021 One of the world's foremost historians of Western political and legal thought proposes a bold new model for thinking about equality at a time when its absence threatens democracies everywhere. How much equality does democracy need to survive? Political thinkers have wrestled with that question for millennia. Aristotle argued that some are born to command and others to obey. Antiphon believed that men, at least, were born equal. Later the Romans upended the debate by asking whether citizens were equals not in ruling but in standing before the law. Aldo Schiavone guides us through these and other historical thickets, from the first democracy to the present day, seeking solutions to the enduring tension between democracy and inequality. Turning from Antiquity to the modern world, Schiavone shows how the American and the French revolutions attempted to settle old debates, introducing a new way of thinking about equality. Both the French revolutionaries and the American colonists sought democracy and equality together, but the European tradition (British Labour, Russian and Eastern European Marxists, and Northern European social democrats) saw formal equality—equality before the law—as a means of obtaining economic equality. The American model, in contrast, adopted formal equality while setting aside the goal of economic equality. *The Pursuit of Equality in the West* argues that the United States and European models were compatible with industrial-age democracy, but neither suffices in the face of today's technological revolution. Opposing both atomization and the obsolete myths of the collective, Schiavone thinks equality anew, proposing a model founded on neither individualism nor the erasure of the individual but rather on the universality of the impersonal human, which coexists with the sea of differences that makes each of us unique.

**The Milan Institute of Physics** Nov 27 2019 This book offers the first comprehensive and authoritative text on the history of physics in Italy's industrial and financial capital, from the foundation of the University of Milan's Institute of Physics in 1924 up to the early 1960s, when it moved to its current location. It includes biographies and a historical-scientific analysis of the main research topics investigated by world-renowned physicists such as Aldo Pontremoli, Giovanni Polvani, Giovanni Gentile Jr., Beppo Occhialini, and Piero Caldirola, highlighting their contributions to the development of Italian physics in a national and international context. Further, the book provides a historical perspective on the interplay of physics and politics in Italy during both the Fascist regime and the postwar reconstruction period, which led to the creation of the CISE (Centro Informazioni Studi Esperienze, a research center for applied nuclear physics, funded by private industries) in 1946, and of the Milan division of the National Institute of Nuclear Physics (INFN) in 1951.

**Ardeal. La fine della Grande Guerra e il nuovo confine romeno-ungherese** Oct 31 2022 Questo volume rappresenta il completamento di una ricerca attorno alla risistemazione dei confini in Europa centro-orientale al termine della Grande Guerra, compiuta nell'ambito del progetto Firb 2010 "L'Europa di Versailles (1919-1939). I nuovi equilibri europei tra le due guerre nelle fonti dell'Archivio dell'Ufficio Storico dello Stato Maggiore

dell'Esercito". Tale fase è stata centrale per la storia di molte regioni e il caso della Transilvania conferma l'importanza di questo delicato momento storico in cui si sono rivisti i confini di molti Stati europei. In qualche modo il libro si collega al precedente volume *Ardeal: le origini della Transilvania romena*, edito da Edizioni Nuova Cultura nel 2011, di cui prosegue l'analisi, soffermandosi sulle implicazioni del cambiamento del confine, tanto per le relazioni bilaterali fra Romania e Ungheria, quanto per la vita e il contesto socio-economico della popolazione locale.
