Guide for Book 1 of the Principles of Mathematics  
- Biblical Worldview Curriculum for junior high!  
Math is a real-life tool that points us to God  
and helps us explore His creation, yet it often  
comes across as dry facts and meaningless rules.  
Here at last is a curriculum that has a biblical  
worldview integrated throughout the text and  
problems, not just added as an afterthought. The  
resources in the Teacher Guide will help students  
master and apply the skills learned in the  
Student Textbook. What does this Teacher Guide  
include? Worksheets, Quizzes, and Tests: These  
perforated, three-hole punched pages help provide  
practice on the principles taught in the main  
student textbook. Answer Keys: The answers are  
included for the worksheets, quizzes, and tests

found in this Teacher Guide. Schedule: A suggested calendar schedule is provided for completing the material in one year, though this can be adapted to meet individual student needs. There is also an accelerated schedule for completing the material in one semester. Are there any prerequisites for this course? This curriculum is aimed at grades 6-8, fitting into most math approaches the year or two years prior to starting high school algebra. If following traditional grade levels, Book 1 should be completed in grade 6 or 7, and Book 2 in grade 7 or 8. In Book 1 students should have a basic knowledge of arithmetic (basic arithmetic will be reviewed, but at a fast pace and while teaching problem-solving skills and a biblical worldview of math) and sufficient mental development to think through the concepts and examples given. Typically, anyone in sixth grade or higher should be prepared to begin. The focus of the course is actually learning math for life, not simply preparing to pass a test. The United States Environmental Protection Agency (EPA) was established in 1970 to address environmental issues, such as acid rain. Through its programs, EPA works to protect human health and the environment in the United States by developing and enforcing regulations and studying environmental conditions. In addition, EPA is committed to informing the public about environmental topics and its efforts to solve them through written materials and its Web site. EPA frequently receives requests for information about environmental problems from school systems, teachers, and individuals. Acid rain is one of the most frequently requested topics. As part of EPA's public outreach on acid rain, EPA first developed this guide in 1990. This revised guide is designed to help students better understand the science, cause and effect, and regulatory and citizen action that are part of understanding and addressing acid rain. This book is intended for teachers of students in 6th-8th grade. It is written at a 6th grade level and the language, concepts, and experiments may need to be adapted for other grades accordingly.
