probability has been introduced
in maths to predict how likely
events are to happen the
meaning of probability is

what is probability probability
is the likelihood of an event or
more than one event occurring
probability represents the
possibility of acquiring a
certain outcome and can be
calculated using a simple
formula probability may also be
described as the likelihood of
an event occurring divided by
the number of expected
outcomes of the event

probability is a branch of math
which deals with finding out
the likelihood of the occurrence
of an event probability
measures the chance of an
event happening and is equal
to the number of favorable
events divided by the total
number of events the value of
probability ranges between 0
and 1 where 0 denotes
uncertainty and 1 denotes
certainty

2022 probability is the branch
of mathematics concerning
numerical descriptions of how
likely an event is to occur or
how likely it is that a
proposition is true the
probability of an event is a
number between 0 and 1 where
roughly speaking 0 indicates
impossibility of the event and 1
