This study of family, household and gender

relations in Latin America by leading specialists illustrates new approaches to the subject developed by researchers from the region over the last decade and reflects advances made in studies that concern the work and place of women in society. The volume is divided into four sections: analytical perspectives on family and gender; production and reproduction; family and kinship networks; and social classes and lifestyles. Each of the sections is prefaced with an introduction that highlights the essential contribution that women make to society in Latin America. The methods and research findings presented by the authors make an important contribution to the understanding of Latin American society and the research paradigms underlying the contributions which provide new and valuable insights into the relationship between the family and the wider institutional context, the links between the social processes of production and reproduction and the mutual determinants of private and public domains have

important implications for the study of family sociology and society in other parts of the world. Since the beginning of the twentieth century, Muslims have been immigrating to the United States from nations such as Lebanon, Yemen, Palestine, Turkey, Iran, Pakistan, and Bangladesh. Previously underrepresented in ethnic studies literature, these nearly four million descendants of previous immigrants and the new arrivals have settled in large numbers in Los Angeles, Chicago, New York, Detroit, and other North American cities. From the social and historical conditions of the Muslim migration to a range of issues affecting Muslim American life, the contributors provide new and valuable information on topics like intergenerational conflict about identity and values, intermarriage, religious and community involvement, gender and family structure, education, the needs of the elderly, and physical and mental health problems, including AIDS. In the final section, some of these issues are given a personal

dimension through the life stories of several immigrants who relate their own experiences of adjusting to life in America. Author note: Barbara C. Aswad is Professor of Anthropology at Wayne State University and the author of *Arabic Speaking Communities in American Cities*. >P>Barbara Bilge is Lecturer in Anthropology and Sociology at Eastern Michigan University and author of several articles on Turks and other Muslims in the Americas. In the contentious debate about women and work, conventional wisdom holds that middle-class women can decide if they work, while working-class women need to work. Yet, even after the recent economic crisis, middle-class women are more likely to work than working-class women. Sarah Damaske deflates the myth that financial needs dictate if women work, revealing that financial resources make it easier for women to remain at work and not easier to leave it. Departing from mainstream research, Damaske finds three main employment patterns: steady,

pulled back, and interrupted. She discovers that middle-class women are more likely to remain steadily at work and working-class women more likely to experience multiple bouts of unemployment. She argues that the public debate is wrongly centered on need because women respond to pressure to be selfless mothers and emphasize family need as the reason for their work choices. Whether the decision is to stay home or go to work, women from all classes say work decisions are made for their families. In *For the Family?*, Sarah Damaske at last provides a far more nuanced and richer picture of women, work, and class than the one commonly drawn. The on-going reconfiguration of geo-political and economic forces across the globe has created a new institutional and moral environment for East Asian family life and gender dynamics. Indeed, modernisation in East Asia has brought about increases in women's education levels and participation in the labour force, a delay in

marriage age, lower birth rates, and smaller family size. And yet, despite the process of modernization, traditional systems such as Confucianism and patriarchal rules, continue to shape gender politics and family relationships in East Asia. This book examines gender politics and family culture in East Asia in light of both the overwhelming changes that modernization and globalization have brought to the region, and the structural restrictions that women in East Asian societies continue to face in their daily lives. Across three sections, the contributors to this volume focus on marriage and motherhood, religion and family, and migration. In doing so, they reveal how actions and decisions implemented by the state trigger changes in gender and family at the local level, the impact of increasing internal and transnational migration on East Asian culture, and how religion interweaves with the state in shaping gender dynamics and daily life within the family. With case studies from across the

region, including South Korea, Japan, mainland China, Taiwan, and Hong Kong, this book will be of great interest to students and scholars of Asian studies, gender studies, anthropology, sociology and social policy. This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare practitioners and fellow scholars, as well as families and their loved ones. Combining developmental psychology, psychoeducation, and systemic therapy, *Families in Transition* highlights the importance of clinicians' own social locations and identities. It puts the responsibility on clinicians to challenge their own cisnormativity

and blind spots, and to evaluate the ways they can become "gender creative." *Gender and the Nuclear Family in Twenty-First-Century Horror* is the first book-length project to focus specifically on the ways that patriarchal decline and post-feminist ideology are portrayed in popular American horror films of the twenty-first century. Through analyses of such films as *Orphan*, *Insidious*, and *Carrie*, Kimberly Jackson reveals how the destruction of male figures and depictions of female monstrosity in twenty-first-century horror cinema suggest that contemporary American culture finds itself at a cultural standstill between a post-patriarchal society and post-feminist ideology. In a dual-earner marriage, why is a wife's paid employment much less likely to be defined as "breadwinning" than her husband's? This book uses data from a study of 153 dual-earner couples to examine the allocation of responsibility for breadwinning and the social construction of gender in their marriages. The

author carefully distinguishes breadwinning from paid employment and uses the insights of gender construction theory to illuminate that distinction. Gender construction theory sees gender as a system of social relations that is continually and actively created in the social interactions of daily life. Using both quantitative and qualitative analyses, this book demonstrates that despite the prevalence of dual-earner marriages, breadwinning is still widely used as a boundary that creates gender by distinguishing the meaning of men's employment from that of women's. The author argues that though the extent to which breadwinning is used as a gender boundary is strongly influenced by adult experiences and circumstances and by the material conditions of couples' lives, it is not determined by these factors. Rather, the meanings attached to husbands' and wives' employment are actively constructed through a process of negotiation that is characterized by both contention and cooperation. Moreover, this

is a highly dynamic process; the breadwinning boundary is renegotiated and reconstructed in response to disagreement, to changing circumstances, and to shifts in other, related gender boundaries. Through its detailed analysis of breadwinning and its development of gender boundaries as a theoretical concept, this book provides new insight into gender relations and makes a contribution to gender construction theory. At the same time, it is engagingly written and provides moving glimpses of the real-life dilemmas of dual-earner couples. "Breastfeeding has become a moral imperative in 21st century America. Once upon a time, this moral imperative made sense. Breastfeeding was believed to bring multiple health benefits, including increased resistance to many chronic and even fatal diseases, protection against Sudden Infant Death Syndrome (SIDS), improved intelligence, and countless immunities. The irony now, however, is that breastfeeding continues to gain moral force just as scientists

are showing that its benefits have been greatly exaggerated. In 2012, the American Academy of Pediatrics and the Center for Disease Control and Prevention declared the failure to breastfeed "a public health issue, " thus placing bottle-feeding on par with smoking, obesity, and unsafe sex. Recently, politicians too have launched highly visible breastfeeding initiatives, such as former New York Mayor Michael Bloomberg's well-publicized Latch On campaign. And, meanwhile, women who don't breastfeed their babies have found themselves with a lot of explaining to do. Physicians, public health officials, and other mothers are pressuring them to breastfeed even though the best science shows that the advantages of doing so are minimal at best. What is going on? In *Lactivism*, Courtney Jung offers the most deeply researched and far-reaching critique of the breastfeeding imperative to date. Drawing on a wide range of evidence, from rigorously peer-reviewed scientific research to interviews with physicians,

politicians, business interests, activists, social workers, and mothers from across the social and political spectrum, Jung presents an eye-opening account of how a practice that began as an alternative to Big Business has become Big Business itself"-- The French Revolution transformed the nation's--and eventually the world's--thinking about citizenship, nationality, and gender roles. At the same time, it created fundamental contradictions between citizenship and family as women acquired new rights and duties but remained dependents within the household. In *The Family and the Nation*, Jennifer Ngairé Heuer examines the meaning of citizenship during and after the revolution and the relationship between citizenship and gender as these ideas and practices were reworked in the late 1790s and early nineteenth century. Heuer argues that tensions between family and nation shaped men's and women's legal and social identities from the Revolution and Terror through the Restoration. She shows

the critical importance of relating nationality to political citizenship and of examining the application, not just the creation, of new categories of membership in the nation. Heuer draws on diverse historical sources--from political treatises to police records, immigration reports to court cases--to demonstrate the extent of revolutionary concern over national citizenship. This book casts into relief France's evolving attitudes toward patriotism, immigration, and emigration, and the frequently opposing demands of family ties and citizenship. Do women express their feelings more than men? Popular stereotypes say they do, but in this provocative book, Leslie Brody breaks with conventional wisdom. Integrating a wealth of perspectives and research--biological, sociocultural, developmental--her work explores the nature and extent of gender differences in emotional expression, as well as the endlessly complex question of how such differences come about. Nurture, far more than nature, emerges

here as the stronger force in fashioning gender differences in emotional expression. Brody shows that whether and how men and women express their feelings varies widely from situation to situation and from culture to culture, and depends on a number of particular characteristics including age, ethnicity, cultural background, power, and status. Especially pertinent is the organization of the family, in which boys and girls elicit and absorb different emotional strategies. Brody also examines the importance of gender roles, whether in the family, the peer group, or the culture at large, as men and women use various patterns of emotional expression to adapt to power and status imbalances. Lucid and level-headed, *Gender, Emotion, and the Family* offers an unusually rich and nuanced picture of the great range of male and female emotional styles, and the variety of the human character. Reviews of this book: *Gender, Emotion, and the Family* focuses on gender differences in the experience

and expression of emotion...[Brody] has gathered an amazing amount of data from innumerable studies...[and gives] a balanced account of the effect of environmental variables on the development of emotion. --Lucy Horwitz, Boston Book Review Reviews of this book: Finally, an accurate and well-balanced discussion of topics that are on everybody's mind. Brody integrates research on the socialization of violence in boys and of the caretaking role for girls. Both this book and actual scientific research strongly support the role of nurture rather than nature in gender socialization...[A] highly recommended book. --F. Smolucha, Choice Reviews of this book: Drawing on a wealth of information, [Leslie Brody] illuminates the ways in which men and women, boys and girls, develop and express emotions in the context of the family...This in-depth research addresses many issues, from power in relationships to the physiological expression of emotion; evidence of contradictory findings is

detailed. This is a valuable addition to the ever-changing frontiers of behavior research. -- Margaret Cardwell, Library Journal Reviews of this book: Beyond the main points about the complexities and contingencies of gender differences and their development, the book contains accounts of many, many fascinating studies and intriguing points of view. . . . Brody ultimately succeeds in articulating a comprehensive, thoughtful, and intellectually rigorous review of the research literature on gender differences in emotional expression, from a feminist empiricist perspective. This is an important book to own . . . a valuable reference for researchers and professionals. -- Contemporary Psychology Brody has formidable mastery of this burgeoning field. Gender, Emotion, and the Family offers new theoretical insights for lay readers and fellow scholars alike. Highly readable, responsible, and original, this will be the major work on the socialization of emotion for a long time to come. --Judith A. Hall,

Northeastern University A beautifully written text that integrates theory and research in a sophisticated yet highly readable way. Brody examines the development of emotional experience and expression in the family and the intimate connections between emotion, familial relationships, and gender. Brody's tremendous breadth of scholarship shows in every chapter, and her thoughtful, comprehensive, and insightful responses to the complex questions in the field are a must read for students and scholars alike. --Amy G. Halberstadt, North Carolina State University Leslie Brody provides a careful evaluation of the research data on precisely what the gender differences are--and are not--in emotional experience and expression, but that is only the first strength of her book. With an original and complex transactional theory, she shows how physiological, relational and cultural factors interact in creating gender differences in emotion, and reminds us how peculiar it is to try--as psychologists have!-- to

make much of any single factor. Gender, Emotion, and the Family outlines a compelling research agenda that will move the next generation of empirical studies to a new and much more exciting level. --Abigail Stewart, Professor of Psychology and Women's Studies, University of Michigan An invaluable resource for researchers on all aspects of the psychology and sociology of gender, Gender, Emotion, and the Family comprehensively synthesizes and re-analyzes the enormous research literature on supposed gender differences in emotional expression. Leslie Brody offers a clear and compelling critique of the widespread belief that males and females have essentially different emotional styles. Arguing that apparent gender differences in emotion are closely related to gender differences in dominance and power, Brody illuminates the great diversity of experience and behavior found among members of the same sex, and reminds us of the powerful role played by stereotypes in dictating emotions

that men and women should display, and the pressures they feel to conform to those stereotypes. --Elizabeth Aries, Amherst College Brody has formidable mastery of this burgeoning field. Karen V. Hansen investigates the lives of working parents and the informal networks they construct to help care for their children. The book concludes with a series of policy suggestions intended to improve the environment in which working families raise children. Amidst the shrill and discordant notes struck in debates over the make-up—or breakdown—of the American family, the family keeps evolving. This book offers a close and clear-eyed look into a form this change has taken most recently, the lesbian coparent family. Based on intensive interviews and extensive firsthand observation, *The Family of Woman* chronicles the experience of thirty-four families headed by lesbian mothers whose children were conceived by means of donor insemination. With its intimate perspective on the interior dynamics

of these families and its penetrating view of their public lives, the book provides rare insight into the workings of emerging family forms and their significance for our understanding of "family"—and our culture itself. *Family Shifts* looks at how families and family policies have evolved during this century; how different trends have affected families in the past and present; how spousal and parental roles have changed; how many policies are based on an inappropriate model of the family (the individual responsibility model): and how a new model of the family - the social responsibility model - might improve family policies. *Family Shifts* will be of interest to the general public as well as to specialists in family law, sociology, social work, family studies, policy studies, Canadian studies, and policy makers. A ground-breaking volume of all new essays covering the conjunction of two topics-- feminism and families--that, for all their centrality in our culture, have not been adequately examined in light of one another.

While the family has suffered feminist neglect, most women are in fact members of families, living their lives within the social context of families, even at a time when the concept of "family" has become bewilderingly unstable. The intersection of families and feminism is thus one in need of philosophical reflection, as a basis both for good public policy and for the ethical relationships of intimate life. `What a pleasure to see this pathbreaking research in print! Karl Ittmann's analysis of Bradford pushes forward our knowledge of the quiet revolution in social habits which took place in the late nineteenth century. In particular, his ability to link the decline of marital fertility with the reorganisation of work and gender roles is exemplary. This book should be of interest to all specialists in Victorian social history.' - David Levine, The Ontario Institute for Studies in Education, Toronto

Work, Gender and Family in Victorian England examines the impact of the Industrial Revolution upon the family and

questions the extent to which ordinary working men and women shared the 'Victorian values' and prosperity of their middle-class countrymen. The book focuses on the industrial town of Bradford, West Yorkshire, in the second half of the nineteenth century and traces how men and women and their families adapted to the new life brought by the rise of the mill and the city. A 1989 examination of the effect of mission evangelism and colonial intervention on the family life of Pacific peoples. Gender and Families uses images from popular culture and events from everyday lives to explore how families and gender are mutually produced and inseparably linked. Author Scott Coltrane teaches gender in an accessible and compelling manner to a wide array of students by weaving discussions of racial differences, ethnicity, and social class into every chapter. Coltrane also includes women and men as both topic and audience in the central chapters of the book. Ideal for use in a gender course, or as a

supplement in family, introductory sociology, or social inequality classes. The authors explain why and how time pressures have emerged and what we can do to alleviate them. In contrast to conventional wisdom that all Americans are overworked, they show that time has become a form of social inequality that is dividing Americans in new ways—between overworked and underemployed, women and men, parents and non-parents. This examination of the extraordinary juggling skills of working women who balance obligations to work & family goes beyond description of possible conflicts of interest to seek an understanding of the decision-making process through which they accomplish this balancing. Discusses women's role in the family, examines gender influences in family therapy, and considers marriage, motherhood, sisters, and lesbian couples The book aims to show that, in the 21st century, it is possible to live, love, form a family without sex, without children, without a shared home,

without a partner, without a working husband, without a heterosexual orientation or without a biological sexual body. This, the first book-length study devoted exclusively to Marx's perspectives on gender and the family, offers a fresh look at this topic in light of twenty-first century concerns. Moonbeam Children's Book Awards Gold Medal Winner This is an illustrated children's book for ages 7-11 that makes gender identity, sexual orientation and family diversity easy to explain to children. Throughout the book kids learn that there are many kinds of people in the world and that diversity is something to be celebrated. It covers gender, romantic orientation, discrimination, intersectionality, privilege, and how to stand up for what's right. With charming illustrations, clear explanations, and short sections that can be dipped in and out of, this book helps children think about how to create a kinder, more tolerant world. Conflict between work and family has been a topic of discussion since the beginning of the women's

movement, but recent changes in family structures and workforce demographics have made it clear that the issues impact both women and men. While employers and policymakers struggle to navigate this new terrain, critics charge that the research sector, too, has been slow to respond. Gender and the Work-Family Experience puts multiple faces - male as well as female - on complex realities with interdisciplinary and cross-cultural awareness and research-based insight. Besides reviewing the state of gender roles as they affect home and career, this in-depth reference examines and compares how women and men experience work-family conflict and its consequences for relationships at home as well as outcomes on the job. Topics as wide-ranging as gendered occupations, gender and shiftwork, heteronormative assumptions, the myth of the ideal worker, and gendered aspects of work-family guilt reflect significant changes in society and reveal important implications for both

research and policy. Also included in the coverage: Gender ideology and work-family plans of the next generation Gender, poverty, and the work-family interface The double jeopardy effect: the importance of gender and race in work-family research When work intrudes upon employees' personal time: does gender matter? Work-family equality: the importance of a level playing field at home Women in STEM: family-related challenges and initiatives Family-friendly organizational policies, practices, and benefits through the gender lens Geared toward work-family and gender researchers as well as students and educators in a variety of fields, Gender and the Work-Family Experience will find interested readers in the fields of industrial and organizational psychology, business management, social psychology, sociology, gender studies, women's studies, and public policy, among others.. The systems approach to the family is based on the assumptions that

there is equality between men and women in the family, and that women and men are treated equally in clinical practice. The contributors to this book challenge these hidden assumptions, discussing the issues from both a conceptual and clinical viewpoint. They argue strongly that questions of gender and power should be central to family therapy training and practice. A groundbreaking analysis of the challenges facing families and governments in the 21st century. 'Jane Lewis is a brilliant conceptual innovator and gifted empirical analyst in the field of social policy. This book expertly illuminates the dramatically changing terrain of social policy with reference to employment, family and gender relations.' - Ann Orloff, Northwestern University, US Gender and Families uses cultural events from our everyday lives to explore how families and gender are mutually produced and inseparably linked. In this updated second edition, Coltrane and Adams continue to demystify the complexities of gender and family

with discussions of racial difference, ethnicity, and social class. This completely updated, second edition offers articles that together develop a systematic understanding of family. It focuses not only on the dynamics of childcare, sexuality, and daily cohabitation, but also on the way that these patterns are shaped by the larger social culture. While some of the readings examine cross-cultural and historical variations in family patterns, highlighting the social organization of things that otherwise seem "natural," the bulk of articles focus on the social relations of sexuality and intimacy, reproduction, parenting, and living together. Because these relations are typically gender relations, a concern with gender inequality is constant throughout the book. Compelling and insightful, this timely work synthesizes a broad range of approaches for all those interested in sociology of the family or women's studies. More important, Coltrane suggests that as fathers participate more fully in raising their children

and performing traditionally female household tasks, men will themselves be transformed by the experience in profoundly positive ways and American society as a whole will move closer to true gender equity. This volume addresses the family situation in Japan and Germany. Gender-segregated labor markets and precarious employment patterns bear detrimental consequences for the socioeconomic capacity to maintain family households and to have children. By applying a gender-sensitive approach, this volume's focus is on the impact of family law, family policy, and family support measures. Scholars from Japan and Germany examine differences and characteristics of social security legislation, intergenerational support systems, single-parent families, inequality among households and poverty situations, local domestic and care service provision, female labor market participation, parental leave systems, organization of child care, domestic violence, historical developments of housework

as an institution, and labor market policies. This book focuses on gender and family entrepreneurship, as they are interrelated concepts particularly important in today's global society. The book highlights the significance of the role of gender in the development and growth of family businesses. It helps readers understand the role of family dynamics in business, particularly in terms of succession planning, strategic development and internationalization. Often, both gender and family entrepreneurship are studied independently, but this book aims to marry both perspectives with a novel approach. This creates a synergy between gender and family entrepreneurship that increases the potential value to entrepreneurship scholarship, policy and business practice. This edited book is a useful and insightful addition to the entrepreneurship field. *Women, Family, and Work* is a collection of original essays on a wide variety of topics related to the economics of

gender and the family. Written by leading thinkers in the field, the essays apply traditional economic theory to unconventional topics, while also developing neoclassical economic thought to provide a better model of economic interactions. 12 newly-commissioned essays on the economics of labor, gender, and family life. Juxtaposes various viewpoints, allowing readers to weigh the benefits and drawbacks of each model. Applies traditional economic theory to unconventional topics, while also revisioning neoclassical economic thought. Bringing new focus to the subject, *THE INVISIBLE WEB* investigates the family from a feminist perspective. Using the lens of gender, connections between mothers and daughters, fathers and daughters, mothers and sons, and husbands and wives are analyzed and given new meaning. The authors evaluate and redefine family transitions such as divorce, single-parent and female-headed households, and remarried couples who are attempting to integrate their

respective children with ex-spouses and complicated networks of extended kin. They also reexamine traditional and emerging roles for women in their early, middle, and later years. Written in an engaging format, each chapter features an in depth analysis of how gender shapes the relationship in question. This discussion is followed by fascinating vignettes of actual cases from each of the four authors, whose approaches reflect different orientations to therapy. Based on the work of the Women's Project in Family Therapy which won the 1986 AFTA Award for Distinguished Contribution to Family Therapy, this groundbreaking work is an excellent text for courses in family therapy and women's studies, an invaluable guide for mental health practitioners, and an insightful read for anyone who wishes to explore the invisible web of gender patterns in families. Locked in the Family Cell is the first book on Ireland to provide a sustained and interdisciplinary analysis of gender, sexuality, nationalism, the public and

private spheres, and the relationship between these categories of analysis and action. Kathryn Conrad examines the writers and activists who are resistant to simplistic nationalist constructions of Ireland and its subjects. She exposes the assumptions and the effects of national discourses in Ireland and their reliance on a limited and limiting vision of the family: the heterosexual family cell. By actively situating theoretical readings and concerns in practice, Conrad follows the lead of scholars such as Lauren Berlant, Gloria Anzaldúa, Ailbhe Smyth, and others who have encouraged dialogue not only among scholars in different academic disciplines but between scholars and activists. In doing so she provides not only a critique of interest to scholars in a variety of fields but also a productive political intervention. This edited collection brings together two strands of current discussions in gender research through the concept of creativity. First, it addresses creativity in the context of the family, by

exploring changing and newly emergent family forms and ways of creating and maintaining intimate relationships. Creativity here is understood not as just “newness or originality,” but as that which, in the words of Eisler and Montouri (2007), “supports, nurtures, and actualizes life by increasing the number of choices open to individuals and communities.” One aim of this book, therefore, is to investigate the social, collaborative, and creative interactions in contemporary family and kin formations in Europe. Second, the volume examines how new media and technologies are entering and shaping everyday family lives. Technological transformations and adaptations have not only enabled the creation of new forms of families and ways of family living, but also challenged the established constellations of gender and family arrangements. The present volume addresses these issues from multiple perspectives and in different contexts, and explores the involvement of different actors. By

problematizing the creativity of becoming and “doing” family and kinship, the authors acknowledge the increasing fluidity of gender identities, the evolving diversity of relationships, and the permeation of technology into daily life. The 'triple overlap' refers to the link between gender stratification, the household and economic variables. In this volume, leading sociologists examine this overlap as a totality, providing theoretical concepts and new research on how the triple overlap works, both inside the

family and within the broader context of society. Their competing conceptions of the interrelationship of gender, family and economy are bolstered by empirical papers which raise questions of culture, class and race within the contexts of both the developed and developing worlds. Six of the articles in this volume were previously published as a Special Issue of Journal of Family Issues.
