Life is bleak and days are insufferable under the dictatorship of the communist regime, as they condition the minds of their subjects by any means necessary. Within Romania's borders, where you are born is where your fate is decided behind its blackout curtains. However, devoted father and husband, David Savin, is not one to be easily beaten into submission. Craving the American dream and new beginnings, David finds allies in unlikely places as well as among old friends. With his beloved brother and late father waiting for him on American soil, he has nothing to lose and much to gain. David will put everything at risk to ensure that all loose ends are tied before daring the unspeakable. Still, there's much room for error in the cramped quarters of an attic in a bustling railcar. The Blue Tears "" Chains and Love is a harrowing novel based on a true story set in the 1980s, during the cruel reign of Nicolae Ceaușescu. In endeavoring to fight for his freedom, David also learns that love is a fine fight to be won as his heart is tormented by his affections for Katie, the girl who cries sapphire tears. Full of wrenching suspense and thrills, as well as

brutal interrogations, heart-stopping betrayal, fierce love, and even greater sacrifice, you'll never know what's to come next or who to trust. American Government: In the United States, the government gets its power to govern from the people. We have a government of the people, by the people, and for the people. Citizens in the United States shape their government and its policies, so they must learn about important public issues and get involved in their communities. Learning about American government helps you understand your rights and responsibilities and allows you to fully participate in the American political process. The Founders of this country decided that the United States should be a representative democracy. They wanted a nation ruled by laws, not by men. In a representative democracy, the people choose officials to make laws and represent their views and concerns in government. This book will help you understand the principles of American democracy, the U.S. system of government, and the important rights and responsibilities of U.S. citizenship. -- page 1. Air Transport and Tourism: Interrelationship, Operations and Strategies is a comprehensive textbook covering all major aspects of air transport from operational and managerial perspectives, as well as exploring the intricate relationship that exists between the air transport and tourism industries. The book introduces and provides in-depth coverage of the complexities of the airline industry and the tourism industry and the ways in which they are connected and impact on each other, for example, the destination-airport-airline nexus, and the roles of air transport and airlines in tourism and vice versa. Emphasis is placed on current and future trends, the impact of COVID-19, sustainability and environmental challenges throughout. Comprehensive coverage of airline operations, strategic management and planning, airport operations and air transport information technology is also provided, offering a practical viewpoint on these vital aspects of the subject. This will be the ideal introductory textbook for students of tourism and hospitality studying courses in aviation and air travel. MCSE Exam 70-296 Study Guide & DVD Training System: Planning, Implementing and Maintaining a Windows Server 2003 Environment for an MCSE Certified on Windows 2000 is a one-of-a-kind integration of text, DVD-quality instructor led training, and Web-based exam simulation and remediation. This system gives you 100% coverage of the official Microsoft 70-296 exam objectives plus test preparation software for the edge you need to pass the exam on your first try. In June, 2003 Microsoft will launch beta exams for the Windows Server 2003 certification line. Exams will likely go live the following August and September. This launch is a comprehensive revamping of the MCSE (Microsoft Certified System Enginner) track with all new core exams and all new electives. In addition, the MCSA (Microsoft Certified System Administrator) certification will expand its program to include an additional upgrade exam for MCSAs wanting to

become MCSEs. The launch of this new certification track means that all current MCSEs, representing an installed base of approximately 200,000 (source: MCP Magazine) will need to recertify under Windows Server 2003. In addition, any MCP looking to become an MCSE-- estimates are about 1.2 million (source: MCP Magazine)--will also have to continue their certifications under the new program. Many industry experts expect the Windows 2003 certification, and product line as well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. * DVD Provides a "Virtual Classroom": Get the benefits of instructor led training at a fraction of the cost and hassle. * Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-296 objectives, it is covered here. * Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams. Since 1993, the Information Security Management Handbook has served not only as an everyday reference for information security practitioners but also as an important document for conducting the intense review necessary to prepare for the Certified Information System Security Professional (CISSP) examination. Now completely revised and updated and in its fifth edition, the handbook maps the ten domains of the Information Security Common Body of Knowledge and provides a complete understanding of all the items in it. This is a ...must have... book, both for preparing for the CISSP exam and as a comprehensive, up-to-date reference. Since the creation of the European market, EU financial regulators have set up a unique model of different passports for financial products and services. The EU concept of the financial passport has been a real innovation in the realm of international finance. This advanced legal tool is becoming more and more important in the world fund industry. This book is the first to address this topic. It is a unique reference work that gives a holistic view of the development of the financial passport inside and outside the EU. As a concise handbook, it offers a clear idea of the concept and reviews all financial passports throughout the world. It also assists the reader in using the relevant passports by providing quick access to various legal references. In addition, it offers a historical overview of different financial passports and describes the evolution of the operational processing and its impact on the value chain. Moreover, this version contains a specific part dedicated to third countries, including paths that might be used after the Brexit. The book is intended for lawyers, students and those wishing to expand their knowledge. The author is a senior consultant to a major European banking group. As part of business management studies in Paris and New York, he developed a forwardlooking vision for financial passports and has notably supported South American financial regulatory authorities. He established, among others, a dedicated global passport service with a capacity of more than five hundred

administrated financial vehicles. In line with regulatory developments, particularly in the EU, he is supporting founders of important funds who are interested in using passports to gain a competitive advantage and grow faster. You've heard you can save big bucks by heading overseas for major medical care-- but you don't want your concerns to get lost in translation. Learn to navigate the international health-care system and find the destination that works best for you. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. Spanning the multi-disciplinary scope of information technology, the Encyclopedia of Information Systems and Technology draws together comprehensive coverage of the inter-related aspects of information systems and technology. The topics covered in this encyclopedia encompass internationally recognized bodies of knowledge, including those of The IT BOK, the Chartered Information Technology Professionals Program, the International IT Professional Practice Program (British Computer Society), the Core Body of Knowledge for IT Professionals (Australian Computer Society), the International Computer Driving License Foundation (European Computer Driving License Foundation), and the Guide to the Software Engineering Body of Knowledge. Using the universally recognized definitions of IT and information systems from these recognized bodies of knowledge, the encyclopedia brings together the information that students, practicing professionals, researchers, and academicians need to keep their knowledge up to date. Also Available Online This Taylor & Francis encyclopedia is also available through online subscription, offering a variety of extra benefits for researchers, students, and librarians, including: □ Citation tracking and alerts □ Active reference linking □ Saved searches and marked lists □ HTML and PDF format options Contact Taylor and Francis for more information or to inquire about subscription options and print/online combination packages. US: (Tel) 1.888.318.2367; (E-mail) e-reference@taylorandfrancis.com International: (Tel) +44 (0) 20 7017 6062; (E-mail) online.sales@tandf.co.uk The Part-2 of the book packed in 10 chapters provides in-depth and detailed information on important issues like civic agencies and service delivery, governance, democracy, election, legislature, bureaucracy, judiciary, reservation and taxation. The book will be of immense value to policy makers, programme planners, public and private sectors, NGOs, social workers, environmental workers, educationists, developmental practitioners and the Delhiites who dream to see Delhi, "A World Class City". Applications for a passport are administered by Her Majesty's Passport Office (HMPO). This executive agency of the Home Office was established on 13 May 2013. At the beginning of June 2014, it became apparent that there were delays in the processing of passport applications. Members of the public who did not contact their MPs were held in queues and their cases were not dealt with a sufficient level of service. All applicants should be able to receive details of their applications, regardless of whether they follow it up themselves, or if it

is followed up by their constituency MP. A number of people have ended up out of pocket due to HMPO's inability to meet its service standard. HMPO should compensate all those people who made an initial application on or after 1 May 2014, who subsequently upgraded to the fast-track service and who met the criteria for the free upgrade which was later offered and the Home Office should remove the agency status from Her Majesty's Passport Office (HMPO) bringing it back under the direct control of Ministers. This report examines how lessons learnt from the introduction of ePassports will be incorporated into future projects; the cost of authenticating applicants' identities; passport fee trends; the measures being taken by the Identity and Passport Service (IPS) to hold down passport fees; and working with others to reduce costs and improve border security. An ePassport contains an electronic chip storing biographical data and a digital facial image of the passport holder. From 2009 new second generation ePassports will incorporate the fingerprints of the passport holder. Passport fees have risen ahead of inflation since September 2003 to fund ePassport technology and other projects intended to improve the security of the UK passport. From 2009 all passport applicants will have to attend in person to provide fingerprints for inclusion in second generation ePassports. The set-up cost of data collection, validation and storage necessary to introduce these changes will be substantial. During 2007 IPS has been introducing personal interviews at its 69 new interviewing offices for first time adult passport applicants. At least one of the 69 offices is intended to be within an hour's travel by public or private transport for 95% of the UK population (except in remote locations). But elderly and disabled people may still face difficulties in making the journey. With the introduction of second generation ePassports, all applicants will need to attend a local office to give their fingerprints. The long term durability of the chip embedded in the ePassport book is unproven. If you're one of the more than five million people who will go on a cruise vacation this year, you may be wondering how to choose between the many cruise lines, ships, and destinations that are available. You may be looking for a cruise geared towards adults, one where both you and the grandkids can have fun, or a cruise on which singles are catered to as much as couples. The key to great vacation is knowing what you need in one convenient place. Looking for an Alaskan cruise in an intimate, Old World-style ship, or a huge ocean liner that can keep all ages happy during a Caribbean family reunion? Cruise Vacations for Mature Travelers helps you, the traveler, determine what kind of cruise experience fits your personality and then tells you how to find it, describing every cruise line and detailing their fleets, ship by ship, so you can choose the perfect vacation! The book also includes tips on budgeting your trip, as well as the options for booking through travel agents, directly with the company, or online. It even helps you choose the best time to travel and the most comfortable cabins. A cruise vacation is an adventure. Make the most of it with Cruise Vacations for Mature Travelers! The need for information security management has never been greater. With constantly changing technology, external intrusions, and internal thefts of data, information security officers

face threats at every turn. The Information Security Management Handbook on CD-ROM, 2006 Edition is now available. Containing the complete contents of the Information Security Management Handbook, this is a resource that is portable, linked and searchable by keyword. In addition to an electronic version of the most comprehensive resource for information security management, this CD-ROM contains an extra volume's worth of information that is not found anywhere else, including chapters from other security and networking books that have never appeared in the print editions. Exportable text and hard copies are available at the click of a mouse. The Handbook's numerous authors present the ten domains of the Information Security Common Body of Knowledge (CBK) ®. The CD-ROM serves as an everyday reference for information security practitioners and an important tool for any one preparing for the Certified Information System Security Professional (CISSP) ® examination. New content to this Edition: Sensitive/Critical Data Access Controls Role-Based Access Control Smartcards A Guide to Evaluating Tokens Identity Management-Benefits and Challenges An Examination of Firewall Architectures The Five "W's" and Designing a Secure Identity Based Self-Defending Network Maintaining Network Security-Availability via Intelligent Agents PBX Firewalls: Closing the Back Door Voice over WLAN Spam Wars: How to Deal with Junk E-Mail Auditing the Telephony System: Defenses against Communications Security Breaches and Toll Fraud The "Controls" Matrix Information Security Governance Windows 2003 Server is unquestionably the dominant enterprise level operating system in the industry, with 95% of all companies running it. And for the last tow years, over 50% of all product upgrades have been security related. Securing Windows Server, according to bill gates, is the company's #1 priority. While considering the security needs of your organization, you need to balance the human and the technical in order to create the best security design for your organization. Securing a Windows Server 2003 enterprise network is hardly a small undertaking, but it becomes quite manageable if you approach it in an organized and systematic way. This includes configuring software, services, and protocols to meet an organization's security needs. * The Perfect Guide if "System Administrator is NOT your primary job function * Avoid "time drains" configuring the many different security standards built into Windows 2003 * Secure VPN and Extranet Communications Going boldly forward . . . This book is a memoir written and edited by Herbert Rosenblum, reflecting the several dimensions of his personal, professional, and communal involvements. His young years on New York City's Lower East Side, his educational and professional training and growth, and his decades of religious and academic service in New York, Massachusetts, and Pennsylvania are recounted in considerable detail. The book is divided into several sectionsinspirational anecdotes, extended interviews, and autobiographical chaptersintertwined to convey a portrait of an extended career of religious, academic, and communal activities. His personal and professional experiences have been deeply enriched by his familial and career involvements and have given this narrative a grippingly humanistic character. His world has

changed much during his blessedly long lifetime, and his life patterns have been greatly influenced by the historical experiences that have taken place in our shared local, national, and international environments. Information technology has revolutionized the way business is conducted, especially since the adoption of the Internet by the business community over the last decade. As the marketplace has become global in character, conducting business electronically has opened up fresh opportunities for reaching new markets for both finding and selling products. New business models are emerging that allow organizations to both reduce costs and achieve competitive advantage through the manipulation of information accompanying the physical business process. A companion web site contains additional material, including a comprehensive glossary. The book's practical approach is reinforced by various case studies. Syngress Study Guides guarantee comprehensive coverage of all exam objectives. There are no longer any short cuts or gimmicks that allow candidates to pass Microsoft's new, more rigorous exams. The days of cramming to become a "paper MCSE" are over; candidates must have a full grasp of all core concepts and plenty of hands-on experience to become certified. This book provides complete coverage of Microsoft Exam 70-277 and features one-of-a-kind integration of text, instructor-led training, and Web-based exam simulation and remediation, this study guide gives students 100% coverage of official Microsoft exam objectives plus realistic test prep. The System package consists of: STUDY GUIDE. 800 pages of coverage explicitly organized in the identical structure of Microsoft's exam objectives. Sections are designed to "standalone", allowing readers to focus on those areas in which they are weakest and skim topics they may have already mastered. ONLINE PRACTICE EXAMS AND E-BOOK. Most exam candidates indicate that PRACTICE EXAMS are their single most valuable exam prep tool. Buyers of our Study Guides have immediate access to our exam simulations located at WWW.SYNGRESS.COM/SOLUTIONS. Syngress practice exams are highly regarded for rigor or the questions, the extensive explanation of the right AND wrong answers, and the direct hyperlinks from the exams to appropriate sections in the e-book for remediation. Readers will be fully prepared to pass the exam based on our 100% Certified guarantee Readers may save thousands of dollars required to purchase alternative methods of exam preparation Because of its breadth of

coverage, this book will serve as a post-certification reference for IT professionals It's here! Now you can stamp your way through the entire National Park System with the newest addition to the Passport To Your National Parks line of products: the Collector's Edition Passport. Beauty and practicality meet artfully in this deluxe version of the popular Passport, taking you above and beyond the original by providing space for Passport stickers and cancellation stamps for every single park, as well as space for extra cancellations. The park sites are color-coded by region, each area featuring a color map that pinpoints park locations. With a spiral binding that makes it easy to lie open flat, a hard cover that ensures durability and longer life, and pages graced with beautiful color photographs, it's the ultimate stamping ground. By leveraging a number of existing and popular technologies, Ajax allows Web applications to make quick updates to the user interface without reloading the entire browser page. It is an ideal resource for developers who want to get started with Ajax-oriented Web developments using current technologies, in particular, Atlas. The Foreign and Commonwealth Office (FCO) provides a range of consular services to British nationals overseas, and when necessary, their families in the UK, including giving travel advice, issuing passports, assisting travellers in difficulty or distress, and dealing with major emergencies such as terrorist attacks or natural disasters. The total cost of consular services during 2004-05 was almost £80 million. Services are provided through over 200 diplomatic posts worldwide including embassies, high commissions and consulates. This NAO report examines the challenges involved in delivering effective consulate services, including providing high quality information to travellers and influencing the behaviour of travellers; providing a consistent frontline service with cost-effective use of resources; response to major emergencies overseas and preparedness response measures. Information and communication technology (ICT) is central to reforming governance, innovating public services, and building inclusive information societies. Countries are learning to weave ICT into their strategies for transforming government as enterprises have learned to use ICT to innovate and transform their processes and competitive strategies. ICT-enabled transformation offers a new path to digital-era government that is responsive to the challenges of our time. It facilitates innovation, partnering, knowledge sharing, community organizing, local monitoring, accelerated learning, and participatory development. In Transforming Government and Building

the Information Society, Nagy Hanna draws on multi-disciplinary research on ICT in the public sector, and on his rich experience of over 35 years at the World Bank and other aid agencies, to identify the key ingredients for the strategic integration of ICT into governance and poverty reduction strategies. The author showcases promising practices from around the world to outline the strategic options involved in using ICT to maximize developmental impact—transforming government institutions and public services, and empowering communities for inclusion and grassroots innovation. Despite the ICT promise, Hanna acknowledges that reforming governance and empowering poor communities are difficult long-term undertakings. Hanna moves beyond the imperatives and visions of e-transformation to strategic design and implementation options, and draws practical lessons for policymakers, reformers, innovators, community leaders, ICT specialists and development experts. Newport Passport Application Processing Centre serves the whole of Wales and south west England. It deals with 47,000 passport applications annually-around 10 per cent of the national total. The Identity and Passport Service (IPS) proposes to close the Passport Office at Newport, with a loss of over 300 jobs, although the Home Office announced that a customer service centre would be retained in Newport to service South Wales and the South West of England. The piecemeal nature of the announcements suggests the lack of a co-ordinated strategy regarding the future of the IPS in Wales. The Office's significance to Wales and its value to the Welsh economy have not been truly appreciated by the Government. No economic impact assessment of the proposal has been completed, and the criteria on which the decision was based should be re-examined. The Newport Passport Office is the second largest employer in the city centre. Its closure would have a significant economic impact on the city and would be a further blow for the Welsh economy. The Committee is not convinced that long-term savings will be made by reducing the size of the Office. The IPS should, on the contrary, provide a detailed appraisal of the costs and benefits of consolidation and expansion as opposed to a reduction of services. Without the retention of the office in Newport, the Government's duty to provide a Welsh-language service to users may not be properly discharged.
