This discounted ebundle of the Three-Body Trilogy
includes: The Three-Body Problem, The Dark Forest,
Death's End "Wildly imaginative, really interesting."
-President Barack Obama The Three-Body trilogy by New
York Times bestseller Cixin Liu keeps you riveted with
high-octane action, political intrigue, and unexpected
twists in this saga of first contact with the
extraterrestrial Trisolaris. The Three-Body Problem - An
alien civilization on the brink of destruction captures
the signal and plans to invade Earth. Meanwhile, on
Earth, different camps start forming, planning to either
welcome the superior beings and help them take over a
world seen as corrupt, or to fight against the invasion.
The Dark Forest - In The Dark Forest, the aliens' human
collaborators may have been defeated, but the presence
of the sophons, the subatomic particles that allow
Trisolaris instant access to all human information
remains. Humanity responds with the Wallfacer Project, a
daring plan that grants four men enormous resources to
design secret strategies, hidden through deceit and
misdirection from Earth and Trisolaris alike. Three of
the Wallfacers are influential statesmen and scientists,
but the fourth is a total unknown. Luo Ji, an
unambitious Chinese astronomer and sociologist, is
baffled by his new status. All he knows is that he's the
one Wallfacer that Trisolaris wants dead. Death's End -
Half a century after the Domsday Battle, Cheng Xin, an
aerospace engineer from the early 21st century, awakens

from hibernation in this new age. She brings with her knowledge of a long-forgotten program dating from the beginning of the Trisolar Crisis, and her very presence may upset the delicate balance between two worlds. Will humanity reach for the stars or die in its cradle? This book focuses on how Chicago actually tried to formulate and implement problem solving as part of a thoroughgoing change in its style of policing. It describes the five-step problem-solving model that the city developed for tackling neighborhood problems ranging from graffiti to gang violence. As of June 1997, there were more than 700 general purpose State and local law enforcement agencies with 100 or more full-time sworn personnel that included 50 or more uniformed officers responding to calls for service. These larger agencies collectively employed about 381,000 full-time sworn personnel, including about 226,000 officers assigned to respond to calls for service. Nearly all of these agencies provided data in response to this survey. Includes sections showing data on personnel, expenditures and pay, operations and equipment, computers and information systems, and policies and programs. Hundreds of statistical tables. Volume contains: 234 NY 530 (People v. Boddy) 234 NY 165 (People v. Visconti) SGN. The Ebook-PDF RBI Grade B Officer Exam: Verbal Ability-English Section Covers Objective Questions From Various Competitive Exams With Answers . Learn how to pass the New York State Entry Level Police Officer Exam and become a Police Officer for a municipality in New York State. The number of candidates taking the exam has increased dramatically in recent years, reflecting the desirability of the profession. In order to succeed against this increased competition, the candidate must be prepared to tackle the unique question types found on the exam. This book contains the most up to date and accurate information to help you prepare for the NYS Police Officer Exam. Written using lessons learned from the latest exam updates, this manual squarely prepares the reader for all of the exam sub-areas including Deductive Reasoning, Inductive Reasoning, Reading Comprehension, Memorization, and Written Expression. This text provides an accessible, up-to-date and thought-provoking introduction to policing for all those undertaking degrees and foundation degrees. It aims not only to inform students and prepare them for their course, but also to expose them to some of the challenges they will face as they begin their studies and/or policing careers. This book is the essential foundation for the Policing Matters series, explaining what policing is, what the police do, the context for policing and what are the main issues it faces and challenges it poses. For the "Retired Blues Crew", a small group of retired LAPD police officers that meet once a month to share old war stories and enjoy each other's company, accepting retirement was a hard pill to swallow. Once considered savvy street warriors who risked life and limb protecting the good citizens of Los Angeles, they were now the forgotten hero's whose past heroic deeds were now only remembrances visited through their colorful story telling during their once a month get-togethers. Like all things in life, they were all expendable and the

guys in the "Retired Blues Crew" had been replaced by a new generation of street warriors. To the old dogs who were put out to pasture, the new centurions were taking their places with new technology and a confidence that bordered on disrespect for those who had paved the way before them. The argument that the old days of crushing crime without the benefit of all the new-fangled gadgets was more rewarding than the technology of the future was a misconception of the new breed that were now in charge of protecting the citizens of Los Angeles. For the select group of old story tellers, they needed to add one more chapter in their lives, something for the street warriors of the present to remember them by when their time finally came and they were reduced to second class citizens too old to do the job anymore. This small tight knit group of old street warriors had enough and it was time to prove beyond a shadow of a doubt that they weren't too old to out-smart and out-wit the high tech rouges who have now taken their places. Proving that computers and gadgets could never replace the wisdom and experience that the old dogs were blessed with wouldn't be an easy task, but they were determined to challenge the new breed and beat them at their own game. They knew whatever it was they were going to do couldn't replicate anything like the violent movies you see were people die, get hurt or cars get wrecked and buildings are blown up, after all they were cops or at least they were once. That being said, the old dogs had to pull off the perfect caper and they had to do it without claiming any of the bragging rights they so much yearned for. It would have to be for no other reason than "For Greater Glory." In that one of their own had been diagnosed with cancer with less than six months to live, they only had a small window of opportunity to get it done. Since he was the architect behind the perfect crime referred to as "Operation Blue Eclipse," their success would depend on how well the plan was executed

with no room for error. If all went as planned and after all was said and done, the Retired Blues Crew would truly know who the best of the best was. Criminology Explains Police Violence offers a concise and targeted overview of criminological theory applied to the phenomenon of police violence. In this engaging and accessible book, Philip M. Stinson, Sr. highlights the similarities and differences among criminological theories, and provides linkages across explanatory levels and across time and geography to explain police violence. This book is appropriate as a resource in criminology, policing, and criminal justice special topic courses, as well as a variety of violence and police courses such as policing, policing administration, police-community relations, police misconduct, and violence in society. Stinson uses examples from his own research to explore police violence, acknowledging the difficulty in studying the topic because violence is often seen as a normal part of policing. The role of the Police Community Support Officer (PCSO) is increasingly demanding and challenging, requiring constant learning and application of practical skills. This book is written as a practical guide for prospective or newly-recruited PCSOs, as well as established officers who want to refresh and develop their knowledge. Linked throughout to the National Occupational Standards, this book introduces the key, universal areas of competency for PCSOs and guides the reader through incidents typical of those PCSOs will encounter. Throughout, these scenarios are addressed with up-to-date policing methods, relevant procedure and legislation. Includes the decisions of the Supreme Courts of Alabama, Florida, Louisiana, and Mississippi, the Appellate Courts of Alabama and, Sept. 1928/Jan. 1929-Jan./Mar. 1941, the Courts of Appeal of Louisiana.
